### **Response to Amendment**

1. The amendment filed 4-3-03 has been entered into the record and has been fully considered.
2. Claims 6-7 are canceled. Claims 1 and 11-19 are pending.
3. The text of Title 35 of the U.S. Code not reiterated herein can be found in the previous office action.
4. As a result of Applicant's amendment, all rejections not reiterated herein have been withdrawn by the Examiner.

### **Election/Restriction**

5. Applicant's election of Group I, claims 1, 6-7 and 12-14 to the extent of SEQ ID NO:3 in Paper No. 16 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

In the response of 4-3-03, Applicant's traverse withdrawal of claims 12-13 as being directed to a non-elected invention. In particular Applicant's point out that claims 12-13 are broader in scope than the subject matter of claim 1 that is elected.

Applicant's arguments have been fully considered but are not persuasive as the peptides are patentably distinct and the subject matter of claims 12-13 is not drawn to elected SEQ ID NO:3. Nevertheless as the first five amino acids are shared in common and claims 12-13 are directed to such motifs, i.e., the inventions of claims 12-13 share common structure with SEQ ID NO:3, within the first five amino acids. Accordingly the claims will be searched and examined. However, the Examiner notes that the election

Art Unit: 1647

of the smallest segment (the first 5 residues) is that which links the inventions and not the sequence of SEQ ID NO:3.

6. Claims 11 and 15-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 16.

This application contains claims 11 and 15-19 drawn to an invention nonelected without traverse in Paper No. 19. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

#### **Claim Rejections - 35 USC § 112**

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 1 and 12-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, claim 1 recites a composition of matter. However, the only element of claim 1 is the peptide consisting of SEQ ID NO:3. If only the peptide is intended then "An isolated peptide..." Is suggested. If a composition is intended then the composition should recite at least one other element such as a carrier.

#### **Claim Rejections - 35 USC § 102**

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1647

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Oldenburg et al., US 5,814,603, Sept. 29, 1998.

Oldenburg et al., teach a PTH analog comprising the sequence of SEQ ID NO:51 that contains 5 residues from the N-terminal of SEQ ID NO:2 "NLGEH" as recited. It is noted that containing is deemed comprising language. The reference is silent as to the peptides activity with respect to producing an antibody which has a binding affinity to nerve growth factors from human body fluids and human origin eukaryotic cells that is higher than a binding affinity exhibited by an antibody produced in immunological response to a nerve growth factor derived from venom as claimed. However, the peptide meets all structural limitations as recited and thus the peptide is deemed to be the same and to provide all requisite functional activities absent convincing factual evidence to the contrary.

#### **Status of Claims**

11. No claims are allowed.

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1647

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
